You save 816,00 €

Two of our flagship speakers that beautifully deliver expansive, deeply immersive Braun sound and high dynamic range with consistent crystal clarity. Includes two floor stands for an exceptional hi-fi stereo set-up.

PRODUCT DETAILS

LE Series - Iconic, timeless performance.
The LE series encapsulates the enduring, essentialist design values of a brand steeped in heritage and craftsmanship. The three premium Hi-Fi smart speakers are all available in black or white, tuned to perfection and built to stand the test of time.
The perfect combination of form and function, the LE range is eye-catching without being intrusive: offering the perfect balance of unparalleled performance in a minimalist form, showcasing the rigour of German craftsmanship.

Excellent sound at all volumes.
All LE speakers are engineered to deliver exceptional detail and clarity at any volume setting. And the unparalleled dispersion of the Balanced Mode Radiator (BMR) drive units provides a near 180-degree soundstage, meaning that the units are always easy to position without the worry of a specific sweet spot of traditional speakers.
The LE speakers have multiroom functionality, as well as ability to be wirelessly stereo paired. Individually, when positioned in landscape mode, LE01 and LE02 will perform as perfect integrated stereo speakers. When in portrait orientation, using floor stands, they can be configured into a stereo pair with each speaker assuming single audio channel duties (left or right).
Placement EQ settings in the mobile app will tailor the playback dependent where the speaker is in the room to achieve the authentic Braun sound. The Braun Audio app will also allow for additional manual fine-tuning to deliver preferred levels of bass and treble.

Sound Control.
The LE series offers more than a premium sound experience. The speakers also serve as a control hub for your smart home and come equipped with smart speaker functionality. With Google Assistant built-in, you can play music, find answers on Google Search, manage everyday tasks and easily control smart

devices around your home - just by using your voice.

Real privacy.
While voice assistants offer many modern conveniences, there are times when privacy is required. Exemplifying Braun's values of honest design, the LE range has been engineered to ensure voice control is always on your terms. Each speaker has a dedicated privacy button that physically disconnects the microphones, guaranteeing complete peace of mind. When privacy mode is enabled, the button and LEDs on the front of the speaker illuminate and are subtly visible from anywhere in the room.

Future-proof.
With Chromecast built-in, the LE range supports over 300 streaming services, while regular software updates ensure system longevity. Each speaker's premium machined aluminium surround is beautiful to the touch, while being highly durable.

LE01 Floor Stand
This elegant, customisable premium speaker stand in a black finish serves as the perfect accessory for your LE speaker.
The Braun LE01 floor stand hides the cable inside the pole for an elegant look. Use it to position the speaker in landscape mode or change orientation to portrait for stereo pairing. This product is designed for mounting the Braun LE01 speaker only and consists of two separate boxes.
Box 1 includes an aluminium-extruded vertical pole with laser cut steel and moulded mounting brackets as well as custom-machined aluminium fixing pins. In Box 2, you find a heavy, high-pressure water cut steel base and polished acrylic base trims.
These timeless accessories accentuate your speakers and are perfect to use them as a stereo pair.

Details
